VNA Private Care Memory Care at Home™

Assuring Safety, Regaining Joy

"Just like running a business, we had to learn to "manage" my parents' healthcare, their home, their financial matters, and just about everything else to do with their lives. It would have been a lot easier if we had "caring coaches" from the beginning to guide us through the process."

~ T.C., former family caregiver, Wellesley, MA

Alzheimer's Disease affects the entire family. The first concern is often to assure the safety of the person with Alzheimer's - preferably at home, among familiar surroundings. Our Memory Care at Home™ Team works with you to both assure safety at home and enhance quality of life for you and the person with Alzheimer's Disease.

The goal of our Memory Care at Home Program™ is to make each moment as joyous, stress-free, and failure-free as possible for the person with Alzheimer's Disease while promoting the health of family members involved in care.

A LEGACY OF CARING

As a member of the Visiting Nurse Association of Boston, families tap into over 120 years of experience and compassionate care for their loved ones.

THE COMPONENTS OF OUR HOLISTIC APPROACH INCLUDE

- Conducting a comprehensive assessment of your situation by a professional care manager with experience in Alzheimer's care.
- Preparing a written care plan to guide your next steps.
- Coaching and advice on issues like managing difficult behaviors.
- Coordinating medical, financial, and legal services.
- Caring companionship from experienced caregivers, supervised by a nurse and trained by an Alzheimer's Association-certified trainer to provide:
 - personal care, like dressing and bathing,
 - assistance with meal preparation and feeding,
 - engaging, one-on-one activities that are both enjoyable and stress-free,
 - social interaction with the client's peers at lunch clubs and other events, and
 - escorted transportation to medical and other appointments.
- Referrals to an array of carefully-selected services that reduce stress and enhance quality of life, including:
 - Environmental assessment of the home to make sure it is safe and accessible
 - Music and drama therapy
 - Specialty services for incontinence and pharmacy
 - Philips Lifeline® personal emergency response and medication management systems
 - Support groups for family caregivers.
 - Access to the [VNA of Boston Family Connection](#) - a secure, private, online service that you can use to keep family members informed - no matter where they live, gather key medical and other information in one place - even collect helpful information for caregivers about your loved one's preferences in music, movies, types of food, and more.
